PERSONAL EXPERIENCES

YARAMASU SAIKUMAR

OCT 10, 2021

After came to masters, during the pandemic Time I was literally shocked to hear the online classes. Why, Because For the offline classes the student will learn lots of knowledge and experience. I was Personally experienced and gain the subject for those wonderful Actions taken By the University. When came to the university for those starting days it is very tough to find the houses and Accommodation. So that the university will not take the chance to go with offline. Now the University took the chance and Running with offline classes with lots of regulations and guidelines. One thing that I feel the wearing masks are difficulty during the classes time. I was Personally experienced and gain the subject for those wonderful Actions taken By the University.

Only thing that I personally feel to courses. The courses are covering all topics which will use for the future carrier goals. For the course assignments I was learning lots of tools and programming languages. In this Applied computer science program will help for my future goals. Firstly, The Program is conducting the main course of OBJECT-ORIENTED PROGRAMMING language and it helps a lot for my future. And the assignments and exams are very interesting to do. Secondly, the course of WEB APPLICATIONS AND SERVERS, it has lot of front-end tools and front-end programming languages. I personally learn some knowledge about web applications and how they work and how the Employees doing work at a same time and doing the websites. Thirdly, the DATABASE is the first time learning the course for me. It will Definitely be useful to my carrier. The main thing is courses timings is very helpful to learn because, for the 5 days courses timings I was learn at least some knowledge about the topics covering in the class.

Finally, the Northwest Missouri State University is offering a good program and good courses. It will be helpful to learn and improve the knowledge. I don't have any recommends for this program to change.
